

# Don't just connect. Lync.

It's like a phone. And like video conferencing.  
And like instant messaging. And like screen sharing.  
Actually, it's not like any communication tool you've ever used.

## Welcome to the age of Lync

### One Communication Experience.

Microsoft Lync is truly a unified communication application with instant messaging, meetings, and voice that brings together tools that work the way you are used to using them.

### Simple, Essential, Reliable Conferencing.

Lync provides built-in desktop and application sharing, PowerPoint uploads, and rich whiteboard capabilities, including the ability to copy and paste images and other content.

### Extend Presence With Personal Note, Location, And Photo.

Presence displays your photo and location along with your personal notes. Set Presence status yourself, or have it set automatically based on your calendar, sign-in status, and more.
